

Website audit & redesign proposal

Radha Exports Pte Ltd

www.radhaexports.com · Audit date: 10 October 2026

Prepared by Muhammad Zain, Softosync · softosync.com

1. Summary

Radha Exports presents a clear, credible story – ABC Bargain Centre since 1995, Valu\$ since 2005, more than 150 outlets and a 380,000 sq ft distribution hub. This audit looks at how well the website currently supports that story for shoppers and wholesale buyers, especially on mobile. Findings come from the live homepage text and the Google PageSpeed Insights mobile report run on 10 October 2026. Items we could not confirm are marked **to verify**.

Category	Score	Comment
Performance	91	Good lab score; TBT 0 ms, CLS 0.001
Accessibility	61	Missing alt text, form labels, page language
Best Practices	88	No doctype (quirks mode), image ratio/resolution
SEO	83	No meta description, images without alt
Agentic Browsing	1/2	Accessibility tree not well-formed

Real-user and lab metrics (mobile)

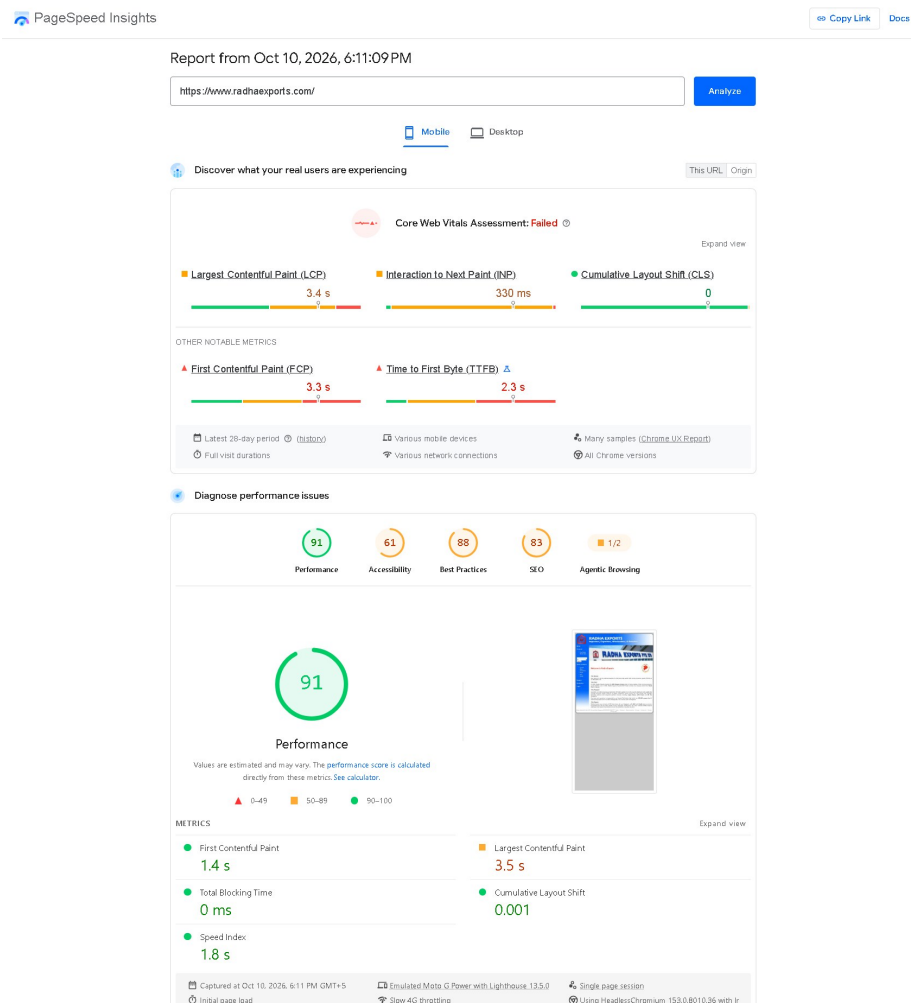

Metric	Value	Note
Core Web Vitals assessment	Failed	Field data from PageSpeed Insights
LCP (field)	3.4 s	Above the 2.5 s "good" threshold
INP (field)	330 ms	Needs improvement
CLS (field)	0	Good
FCP / TTFB (field)	3.3 s / 2.3 s	Slow first paint and server response
LCP (lab)	3.5 s	Largest Contentful Paint
Estimated savings	496 KiB · 338 KiB · 900 ms	Cache lifetimes · image delivery · render-blocking requests

2. Screenshot evidence

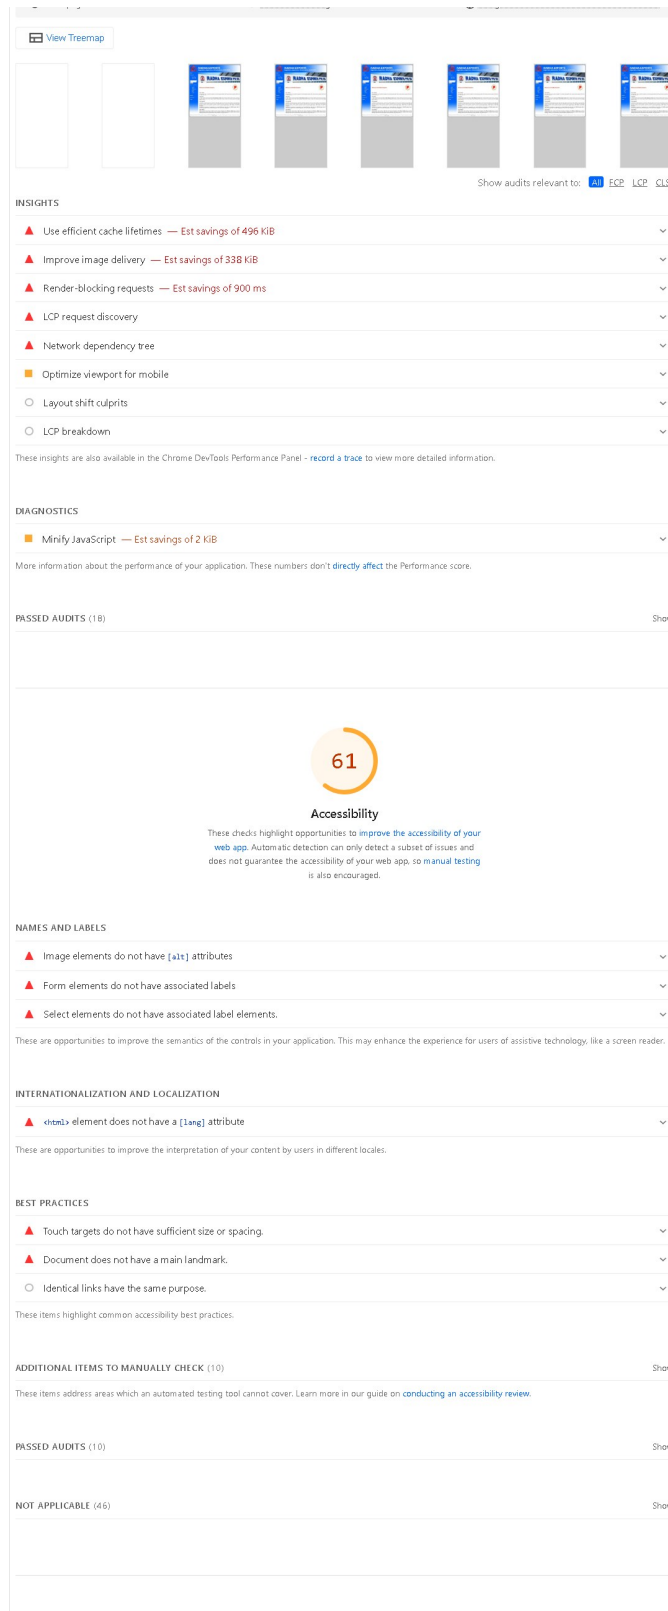

Homepage as reviewed (desktop capture, 10 Oct 2026)

PageSpeed Insights - mobile report summary

PageSpeed Insights - accessibility, best practices and SEO findings

3. Issues and recommended fixes

Area	Problem	Priority	Fix
Accessibility	Images have no alt attribute; form fields have no associated labels; <html> has no lang attribute; no main landmark; touch targets too small; identical links with the same purpose.	High	Add descriptive alt text, labels, lang="en", a <main> landmark and 48 px tap targets.
SEO	No meta description; images without alt text.	High	Write a unique description (about 155 characters) and alt text for every image.
Standards	Page lacks an HTML doctype, which triggers quirks mode.	High	Add <!DOCTYPE html> and re-test the layout.
Mobile	Fixed-width desktop layout; PageSpeed flags the viewport setup.	High	Rebuild with a responsive, mobile-first layout.
Speed	Core Web Vitals failed on field data (LCP 3.4 s, INP 330 ms). Savings: 496 KiB cache, 338 KiB images, 900 ms render-blocking.	High	Long cache lifetimes, WebP/AVIF responsive images, defer blocking CSS/JS.
Images	Images show with wrong aspect ratio and low resolution.	Medium	Export correct sizes; set width/height attributes.
Navigation	Home, Store Locations and Contact Us use javascript:; links, which cannot be crawled, shared or bookmarked.	Medium	Use real URLs (e.g. /stores, /contact).
Store data	Circuit Road postcode has 7 digits (3700877). Haji Lane appears as 189221 and 198221; 284 Bishan as 570284 and 570209; "Kim Kent Palm" vs "Kim Keat Palm"; "Bungkok Link".	Medium	Keep one store database that feeds every list.
Store count	The directory lists 116 locations, while the homepage states "more than 150 retail outlets".	To verify	Confirm the figure and align the directory.
Contact info	Footer phone (65) 6220 2777; Contact page lists only +65-97707922 and a fax.	Medium	Present one clear contact block with click-to-call.
Duplicate content	Store lists appear twice in the page text we retrieved.	To verify	Check whether this is a desktop/mobile duplicate and remove it.
Footer / copy	No copyright year visible; "Our back end operations is..." grammar.	Low	Add the year; proofread copy.

4. UI review

The current design (blue gradient sidebar, boxed fixed-width layout) works on a large desktop screen but does not reflect the size of the business.

- **First impression:** the hero photo and a long text block carry the page. The key numbers (150+ outlets, 380,000 sq ft, 300-store goal) are buried in paragraphs.
- **Finding a store:** six region links open long, repeated address lists. A single search box with region filters would be much faster on a phone.
- **Two audiences:** shoppers want a nearby store; wholesale buyers need the \$3,500 minimum order and a direct call. Both are hard to find today.
- **Brand:** ABC Bargain Centre, Valu\$ and partners (Japan Home, ACE Fresh, Mr Fix Singapore) deserve clear visual space.
- **Mobile:** the left-hand menu and fixed width require zooming and pinching.

5. Strengths

- A clear history and vision, with real milestones (1995, 2005, 150+ outlets, 300-store goal).
- Singapore Brands 2024 recognition shown on the homepage.
- A transparent B2B rule: minimum order of \$3,500, with retail stores for smaller orders.
- Strong lab performance (91) and zero blocking time with a stable layout (CLS 0.001).
- A store directory organised by region, plus product pages for top sellers and what's new.

6. Four-week action plan

Week	Focus	Deliverables
1	Foundations	Doctype, lang, viewport, main landmark, meta description, alt text, form labels, real navigation URLs
2	Design & mobile	Responsive homepage, hero with key numbers, brand section, B2B enquiry block
3	Store finder	Searchable directory with region filters and a single clean store database
4	Speed & launch	Image optimisation, caching, render-blocking fixes, re-test PageSpeed, go live

We usually deliver this in phases (homepage, store finder, product catalogue), so you can start small and expand. Pricing is shared after a short call.

7. Live demo

We built a homepage demo from your own content, including a searchable store finder with all 116 listed locations:

<https://softosync.github.io/client-demos/radha-exports/>

The demo is a preview only and is not indexed by search engines.

8. Next steps

- Review the demo on your phone and desktop.
- Book a 20-minute call or online meeting – we will walk through the findings.
- Choose a starting phase; we send a fixed-scope proposal.
